

MEDIA RELEASE

8 February 2024

NORTHERN MELBOURNE WILL SOON BE RECEIVING INCREASED SPECIALIST IMAGING SERVICES WITH THE OPENING OF TWO LUMUS STATE OF THE ART IMAGING CENTRES

Lumus Imaging is excited to be providing quality diagnostic imaging and exceptional customer services to the new La Trobe Private Hospital in Bundoora and Northern Private Hospital in Epping in early 2024.

Both clinics will feature the latest in imaging technology so the local community can benefit from the very best in orthopaedic, cardiology and sports medicine imaging, says Lumus Imaging Group Executive, Dr Phil Lucas.

“We are delighted to partner with Healthscope at La Trobe Private Hospital and Ramsay Health Care at the Northern Private Hospital to provide two new imaging practices in Northern Melbourne,” said Dr Lucas.

“Our practice at **La Trobe Private Hospital**, opening on 12 February, will offer a full suite of imaging services including MRI and features the latest Siemens Multitom Rax Robotic X-ray system - the first of its kind in Victoria. The Multitom Rax offers multiple imaging modalities in a single system, including fluoroscopy, X-ray and full body weight bearing X-ray and is particularly useful for orthopaedics and spinal surgery.”

“This practice is also co-located with La Trobe University, which has a large Medical Science Faculty with expertise in sports medicine, providing the opportunity to help facilitate key imaging research projects.”

Lumus Imaging is also delighted to be servicing the **new Northern Private Hospital in Epping** with a purpose-built, modern imaging clinic servicing the hospital opening on 5 February.

“As a longstanding provider of imaging services in the northern suburbs of Melbourne, it is great to be able to build relationships with hospital Specialists at these two new exciting hospitals. We also appreciate the opportunity to continue our long-standing relationship with Northern Health. We look forward to continuing to provide PET services to Northern Health patients and support Northern Imaging Victoria (NIV) with its Radiology Fellowship Programs as well as other collaborative initiatives between the two organisations,” said Dr Lucas.

“The two new Lumus Imaging centres will certainly complement our other imaging services in the northern suburbs of Melbourne at Epping Consulting Clinic and our medical centre clinics at Epping Plaza and Greensborough. Once open, our caring and professional teams will be ready to welcome patients from our local community via GP and Specialist referrals.”

For more information on the openings of the Lumus Imaging centres at La Trobe Private Hospital and Northern Private Hospital in Epping, please call Shirley Brown on 0447 680 931
